People gained per square

- ≤ −25
- −25 to −5
- −5 to 5
- 5 to 25
- 25 to 50
- 50 to 100
- 100 to 200
- > 200
- Central zone edge
- Intermediate edge
- Distant edge
- Urban centre
- Centre

Each square is 100 metres across and shows people in 2020 minus people in 1990, from GHS-POP, a modelled population grid, inside the 2025 GHSL outline of Ibadan. Red squares gained people and blue squares lost them. The circles mark the edges of the central, intermediate and distant zones around Mapo Hill.
