KADUNA, 1990 TO 2020
Where people were added and lost

People gained per square

- ≤ −25
- −25 to −5
- −5 to 5
- 5 to 25
- 25 to 50
- 50 to 100
- 100 to 200
- > 200
- Central zone edge
- Intermediate zone edge
- Distant zone edge
- Study area
- Local government area
- Lugard Hall

Each 100-metre square shows people in 2020 minus people in 1990 (GHS-POP) across the 4 local government areas of Kaduna, which gained 1.0 million people. The circles are the central, intermediate and distant zone edges around Lugard Hall, at 4.3, 7.2 and 13.5 km. The central zone held 28% of the city's people in 1990 and 22% in 2020, and the typical resident lived 2% farther from the centre (expected from all Nigerian cities: 20% farther).
