KANO, 1990 TO 2020
Where people were added and lost

Each 100-metre square shows people in 2020 minus people in 1990 (GHS-POP) across the 16 local government areas of Kano, which gained 3.3 million people. The circles are the central, intermediate and distant zone edges around Gidan Rumfa, at 7.5, 12.5 and 23.2 km. The central zone held 55% of the city's people in 1990 and 50% in 2020, and the typical resident lived 5% farther from the centre (expected from all Nigerian cities: 19% farther).
