ONITSHA, 1990 TO 2020
Where people were added and lost

People gained per square

- ≤ −25
- −25 to −5
- −5 to 5
- 5 to 25
- 25 to 50
- 50 to 100
- 100 to 200
- > 200
- Central zone edge
- Intermediate zone edge
- Distant zone edge
- Study area
- Local government area
- Ime-Obi Ogboza

Each 100-metre square shows people in 2020 minus people in 1990 (GHS-POP) across the 5 local government areas of Onitsha, which gained 1.2 million people. The circles are the central, intermediate and distant zone edges around Ime-Obi Ogboza, at 4.3, 7.2 and 13.3 km. The central zone held 21% of the city's people in 1990 and 24% in 2020, and the typical resident lived 5% closer to the centre (expected from all Nigerian cities: 19% farther).
